

The University of Melbourne

Raising a child with cochlear implants is a complex responsibility

Do you care for a child with a cochlear implant?

We want to hear about the challenges you've faced and how we can improve this experience.

By completing a quick and easy survey, your valuable input can help support other parents and caregivers in the future.

Who can participate?

Parents or caregivers of a child
implanted under 3 years.

To access the survey, please scan the
QR code or contact the researcher
using the details provided below.

For more information, contact Dilshan Delgama from the Department of Audiology & Speech Pathology at The University of Melbourne (ddelgama@student.unimelb.edu.au or +61 415 727 821).
